

## HOW TO RECORD AND UPLOAD VIDEO AUDITIONS

### 1

#### PREPARING FOR YOUR AUDITION

- Locate the folder corresponding to your audition
- Inside your folder, you will find the song recording, chart, tutorial, and audition track. 1) Use the recording to listen to how the song goes, 2) Use the chord chart and tutorial to learn how to play the song, and 3) Use the Audition Track to play your part along with the song (the audition track will have the song without your specific instrument in it, like a karaoke track).

### 2

#### RECORDING YOUR AUDITION VIDEO

- Using any device available to you (smartphone, laptop, webcam), record a video of you playing your audition part
- **Important:** Setup your recording where we can hear the audition track and yourself. We want to hear you play along with the metronome! Have this playing in the background of your video using another device and play along with it.
- If you are not tech-savvy, do not sweat it! Even if the video quality is not perfect, we can still get an idea of your skill level. We want to see your videos!
- **Vocalists:** Record yourself sing once with the backing track and once without (a cappella). Also, record yourself harmonizing with the male-led song (for female vocalists) or the female-led song (for male vocalists).

### 3

#### UPLOAD YOUR AUDITION VIDEO TO YOUTUBE

- Anyone can create a YouTube account for free! You can upload your video to YouTube after you have made it. IF you use any other video sharing platform, that is fine as well!
- Under the privacy setting on your video, make sure you select "UNLISTED" so that no one else can see your video but the ones you share the video with.
- Please title your videos "YOUR NAME - Grace Worship Audition."
- Share the link with us in the audition form!
